

CoPilot

A BETTER WAY TO TAKE CONTROL

FEATURES

Why CoPilot?

CoPilot empowers you to take control of your lighting systems like never before. It's more than a tool - it's your partner in achieving seamless, efficient, and cost-effective solutions for service and controls.

Remote access allows you to control your system from anywhere in the world.

Our user-friendly interface makes it easy to schedule and design displays.

Our platform is certified under IEC 62443 standards to keep your data safe.

Remote service eliminates the need for costly on-site visits. Limit downtime and expensive service calls.

View real-time insights into your system's health. No more guesswork or lengthy troubleshooting processes.

When every minute counts, CoPilot ensures you get the fastest, most efficient support possible.
