

RigSafe

ELEVATING SAFETY AND CONFIDENCE

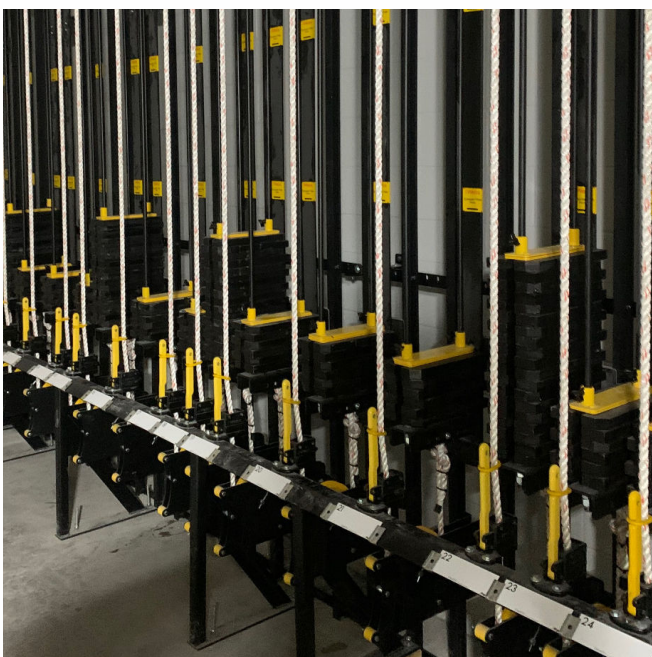

TECHNOLOGY FOR
VISUAL ENVIRONMENTS

What is RigSafe?

RigSafe is a comprehensive program presented by VLS that brings in ETCP Certified Riggers to thoroughly assess your rigging system. Whether you're involved in theater, live entertainment, or any other venue dependent on rigging, having certified experts inspect your equipment becomes an invaluable asset.

Rigging inspections made simple.

We understand that not everyone in theater administration possesses rigging expertise.

This knowledge gap can make it challenging to make informed decisions regarding rigging system maintenance and enhancements. This is precisely where RigSafe steps in to make a difference.

Why choose us?

The RigSafe inspection process goes beyond a superficial glance at your rigging system. It entails a comprehensive evaluation conducted by experts with decades of experience in installing and inspecting various rigging systems.

Our objective extends beyond identifying potential issues to provide you with a clear and comprehensive report on your system's current condition.

More Than an Inspection

The RigSafe experience doesn't conclude with the inspection itself. Post a rigorous evaluation, you'll receive a detailed written report. This report is designed to be comprehensible to all, even if you don't have a background in rigging. It offers an insightful overview of your system's status, including any areas warranting attention.

Reference Images

We provide images with our report so you can easily see each step of the inspection.

Maintenance Plan

After your inspection, we give you a roadmap with next steps to help you plan, budget, and keep your space safe.

Term Glossary

We provide a helpful term glossary to assist readers that do not carry trade knowledge.

We'll Help You Stay on Track

In addition to providing meticulous inspections, our ETCP Certified technicians give you in-depth yearly reports for both automated and manual rigging systems. We'll remind you of routine inspections to help mitigate unexpected issues.

Did You Know?

ETC requires annual inspections for automated rigging systems to maintain their manufacturer's warranty for up to 3 years.

OUR INSPECTIONS INCLUDE:

Visual Inspection	
Physical Inspection	
Automated System Testing	
Counterweight Inspection	
Curtain Flame Test	
Fire Curtain Inspection	
General Field Measurements	
In-Depth Report	
Maintenance Plan	

Additional Add-Ons
